Category

[Trauma and Musculoskeletal \(https://galwayem.ie/guidelines/trauma-and-musculoskeletal\)](https://galwayem.ie/guidelines/trauma-and-musculoskeletal)

**In severe multi system or penetrating trauma, the Resus team will be called.**

### **Isolated abdominal trauma**

If you suspect an abdominal injury in a patient with less severe trauma:

- Control haemorrhage if possible
- 1 or 2 large bore IV lines as appropriate
- Bloods for FBC, U&E, Group and save / X-match, amylase
- Examine urine
- Seek senior ED/ surgical advice.

### **Macroscopic haematuria following trauma**

- Seek senior ED advice.
- Discuss with urology.
- Consider CT.

### **Microscopic haematuria**

- Of little significance in absence of other signs.
